We Produce Ourselves...

Bebeji Design was founded as a trade company in 1989. Today our company has a team of 70 people, production and storage facilities with the total area of 10.000 square meters. We produce wooden baby and children's toys, preschool and school supplies, wooden, metal plastic and soft playgrounds. Also with our experienced architectural staff and modern machine tracks, we make special project designs. Our company has supply of imported toy groups and with many brand franchises. Precise and coordinated teamwork has made us one of the leading companies in this market in a short time. We are working hard for children's happiness by designing and producing new, safe, fun, high quality and affordable products for our children's future.

Why are we different, what do we do ?

Our playgrounds have been implemented according to landscape planning and design principles and have a positive impact on the social and mental development of children during their developmental periods.

PROJECT SPECIAL DESIGNS

Our designers design completely new products if deemed necessary for relevant projects.

- We Produce Different and Functional Products.
- We Design and Architect Children's Playgrounds.
- We Design and Make Innovative and Functional Products.
- Lifelike 3D Visualization
- We Design the Playground of Your Dreams.

Professional Planning and Design

Amusement parks, recreational areas, site gardens, children's villages, towns, shopping malls, entertainment and tourism centers, hotels, schools, nurseries. With our wide product and area portfolio, we can design a special playground for you and design new products and areas.

Quality - Safe - Fun

Children's safety begins at the design stage and continues with the quality of the materials used in production. Our products are durable and long-lasting. In addition to its durability, its forms are soft, round and complemented by colorful decorations. This group will be very appealing to young children.

Playgrounds That Both Entertain and Teach

Let's Discover

002 **bebeji**
design

Rhythm

Using sound and rhythm on gaming equipment music can be made.

Perception Development

Children's shapes, textures, colors and includes equipment to help him feel and learn sounds.

Water and Sand Games

It refers to play equipment that allows playing with water and sand and mud and makes it easier to touch natural materials.

Understand and Learn

Helping children better understand and learn about their environment Includes helpful equipment.

Balance

Ability to focus and stay balanced strengthening equipment is used.

Observe and Explore

Observing and exploring for children Includes supporting equipment.

Socialization

Let children play and share together allows it to be found.

Daydreaming

Children's imagination while playing There is equipment that can be improved.

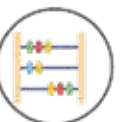

Strength - Endurance

Where children can discover their powers. Includes equipment.

Coordination

In play groups, we help children flex their muscles together. There is equipment that teaches them to use it in harmony.

Arithmetic

Improving arithmetic skills, reading and writing and includes equipment that allows for counting.

Motor Skills

Children's fine and gross motor skills There is equipment to help develop.

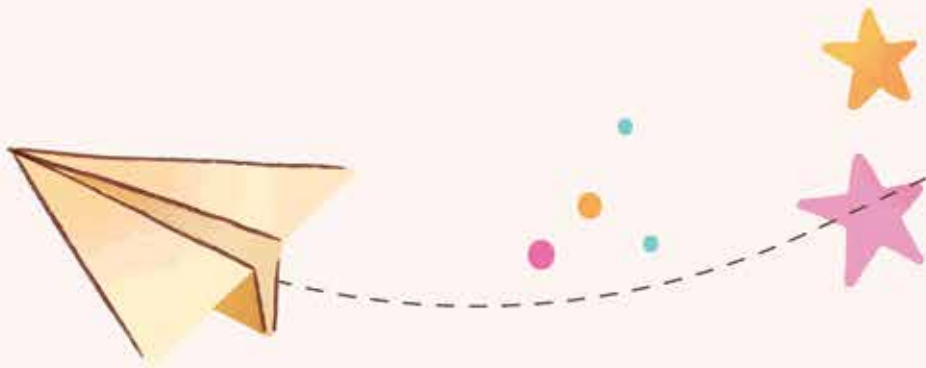

To relax

Where children can rest and get back into the game They can store the energy needed to return Includes equipment.

Getting Organized

Harmony and order of children while playing It includes equipment to help you learn.

pictogram

Pine trees grow around the world, pine has a great deal of stiffness and resistance to shock, which makes it a solid choice for many furniture pieces. Pine tends to be easier to work with during the furniture building stage due to its softer nature.

Pine

The park equipment, whose edges are carefully softened, is both effective in preventing accidents that may occur in the children's group and more aesthetic in terms of design.

Edge Smoothing

Polyethylene used in playgrounds, guardrails, slide, roofs, swings, etc. The polyethylene raw materials used in the production of the products are suitable for child health.

Polyethylene Plastics

It is used to protect children from possible accidents and injuries. Visually, it is possible to hide mounting elements such as screws, nuts and screws in our parks. It also gives a stylish look to our playgrounds.

Screw Protector

Transparent, excellent water repellency, breathes and gives the moisture inside the wood to the outside. It is resistant to sun rays (UV), humidity and other outdoor conditions. It does not contain heavy metals and lead. Eco-Friendly.

Industrial Lacquer

It is an excellent building material. Suitable for garden furniture, harbor docks and bridges, playgrounds and exterior structural uses and many other elements. It is protective against elements such as mold, fungus, insects and increases the durability of pine 10 times.
