We Produce Ourselves...

Bebeji Design was founded as a trade company in 1989. Today our company has a team of 70 people, production and storage facilities with the total area of 10.000 square meters. We produce wooden baby and children's toys, preschool and school supplies, wooden, metal plastic and soft playgrounds. Also with our experienced architectural staff and modern machine tracks, we make special project designs. Our company has supply of imported toy groups and with many brand franchises. Precise and coordinated teamwork has made us one of the leading companies in this market in a short time. We are working hard for children's happiness by designing and producing new, safe, fun, high quality and affordable products for our children's future.

Professional Planning and Design

Amusement parks, recreational areas, site gardens, children's villages, towns, shopping malls, entertainment and tourism centers, hotels, schools, nurseries
With our wide product and area portfolio, we can design a special playground for you and design new products and areas.

Quality - Safe - Fun

The installation of indoor playgrounds is carried out safely and quickly by our expert team. All safety precautions during the installation process
It is implemented meticulously and care is taken to use the space in the most efficient way. Bebeji Design, which is among the companies that make indoor playgrounds,
It offers the best service to its customers during the installation process. As a playground manufacturer, we prioritize safety and quality during installation.

Playgrounds That Both Entertain and Teach

Let's Discover

our experience what makes us unique

Why are we different, what do we do ?

As an indoor playground manufacturer, we ensure that children spend time in a fun and safe environment.

We exceed our customers' expectations.

- We Produce Different and Functional Products.
- We Design and Architect Children's Playgrounds.
- We Design and Make Innovative and Functional Products.
- Lifelike 3D Visualization
- We Design the Playground of Your Dreams.

PROJECT SPECIAL DESIGNS

As a children's playground manufacturer, we produce playgrounds where children can have fun and increase their physical activity. We offer the highest quality and reliable solutions for families and businesses who want to build a children's playground. Bebeji Design, which has a wide range of playground equipment, makes a difference in the sector with the equipment it produces using the highest quality materials for the safety and entertainment of children. We stand out in the industry with children's playground equipment and children's playground equipment.

Soft Play moves
bodies, minds, and dreams.

Rhythm

Using sound and rhythm on gaming equipment music can be made.

Perception Development

Children's shapes, textures, colors and includes equipment to help him feel and learn sounds.

Water and Sand Games

It refers to play equipment that allows playing with water and sand and mud and makes it easier to touch natural materials.

Understand and Learn

Helping children better understand and learn about their environment Includes helpful equipment.

Balance

Ability to focus and stay balanced strengthening equipment is used.

Observe and Explore

Observing and exploring for children Includes supporting equipment.

Socialization

Let children play and share together allows it to be found.

Daydreaming

Children's imagination while playing There is equipment that can be improved.

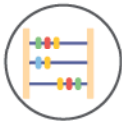

Strength - Endurance

Where children can discover their powers Includes equipment.

Coordination

In play groups, we help children flex their muscles together. There is equipment that teaches them to use it in harmony.

Arithmetic

Improving arithmetic skills, reading and writing and includes equipment that allows for counting.

Motor Skills

Children's fine and gross motor skills There is equipment to help develop.

To relax

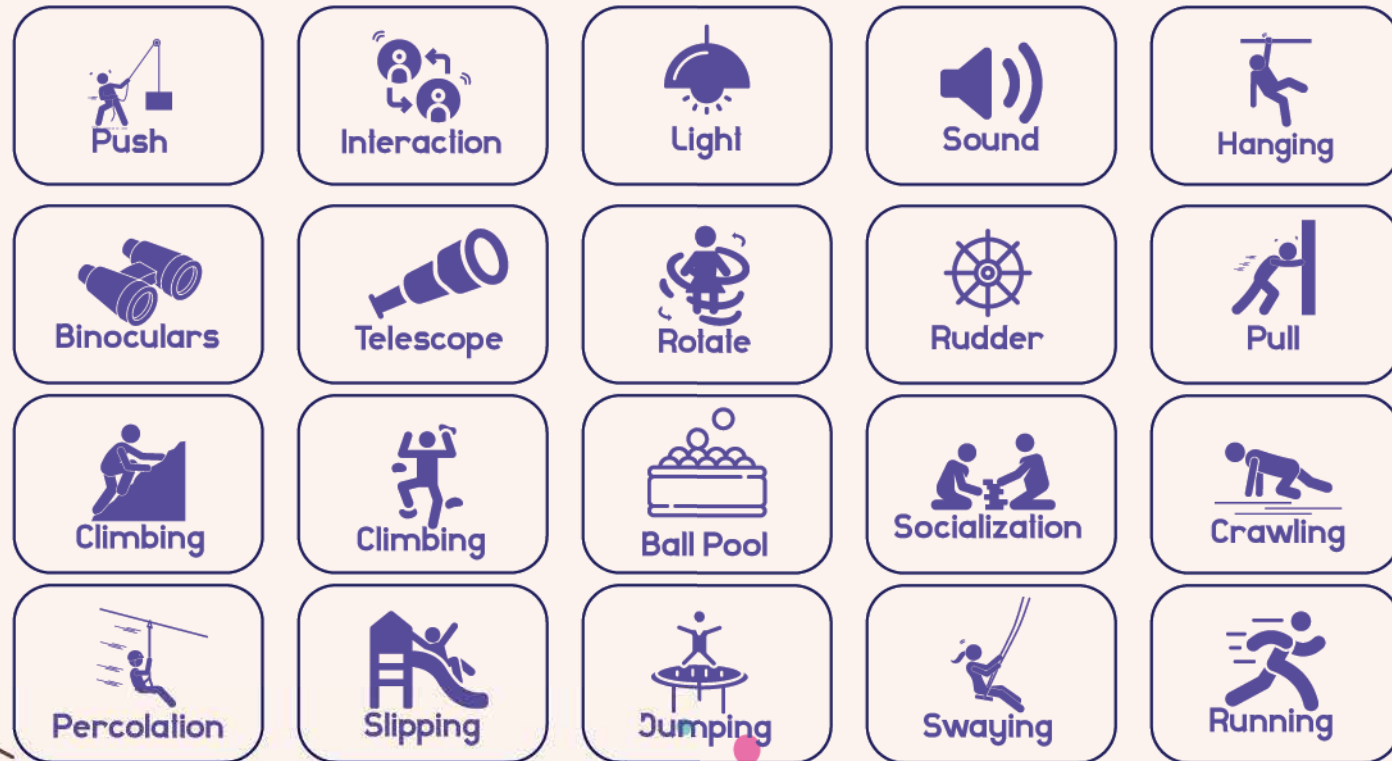

Where children can rest and get back into the game They can store the energy needed to return Includes equipment.

Getting Organized

Harmony and order of children while playing It includes equipment to help you learn.

Sensory Playground Equipments

Softplay Solutions can design, manufacture and install a bespoke multi-level play structure to suit you. We work with a variety of different clients: you might want to convert a large room in your nursery school, install a play structure in a leisure centre, or start up your own soft play centre business. Whatever your requirements, we'll work according to your idea, or one of our own imaginative themes, to produce a suitable structure that really impresses. Our great range of soft play products ensures that you can pack your multi-level play structure full of the soft play equipment of your choice. From an exciting ball pool – the central attraction of many soft play areas – to fun soft play animals. From giant's causeway blocks, to log climbs and slides.

MATERIAL DETAILS

Steel Pipe

It is made of 40x40 iron profile and covered with PE foam and sponge.

PVC Cover

A tear-resistant 1100 denier 650 gram PVC tarpaulin was used.

Protection Nets

4x4 For the safety of children, the panels are knitted with nets.

MDF

18 mm MDF material was used on the platforms.

Steel Spring

18 cm galvanized steel springs were used.

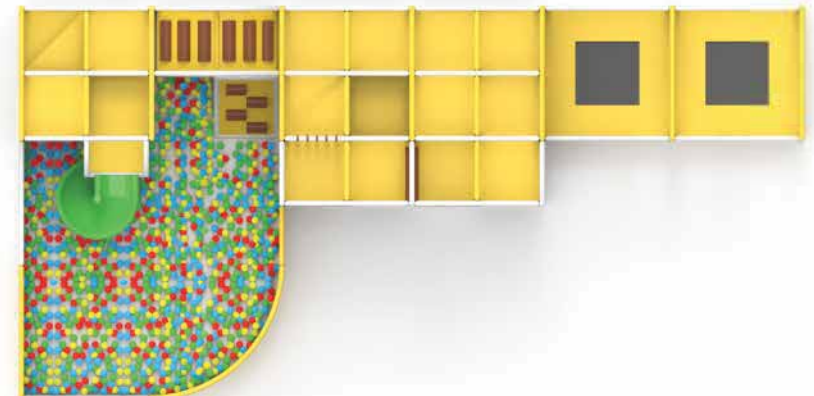

Upholstery Sponge

22 DNS sponges of 2 cm are used on the platforms.
22 DNS sponge of 7 cm is used in the trampoline mat.

Professional
Soft Play

THE BENEFITS OF SOFT PLAY

Soft play areas are specially designed play zones where children can play safely. These areas are padded with soft, cushioned materials to ensure a safe environment for children. They are typically constructed using foam, sponge, soft plastic, and other similar materials to prevent injuries in case of falls or collisions. The flexible and soft nature of these materials ensures that children do not get hurt even if they fall onto them. The floors are usually covered with thick, soft mats, and the walls are lined with padded panels. Additionally, various play equipment such as climbing structures, slides, tunnels, and obstacle courses are also covered with soft materials. Soft play areas are often found indoors and are decorated with various themes. Their colorful and attractive designs capture children's attention and encourage them to use their imagination while playing. These areas are commonly located in shopping centers, entertainment venues, daycare centers, and schools.

Hygienic

Motor Skills

Imagination

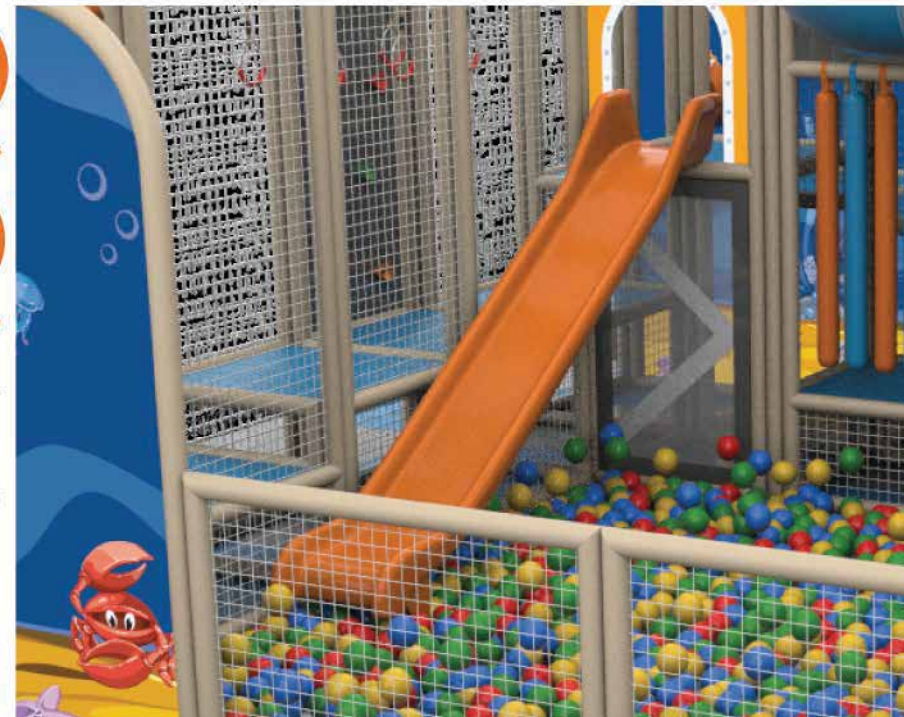

Socialization

Soft play areas are designed and installed in accordance with various safety standards to ensure they are suitable for children's ages and physical abilities. There is usually adult supervision in these areas to monitor the children while they play and to intervene if necessary.

In addition to providing physical safety, soft play areas also offer a hygienic play environment. Made from easy-to-clean materials, they can be regularly cleaned and disinfected to ensure children's health is protected.

Square Ball Pool

Socialization

Ball pits provide the perfect environment for children to develop social skills by playing together.

Motor Skills

It improves muscle coordination and balance in children through actions such as holding, throwing and moving with balls.

Creativity and Imagination

Children can create different games using their imagination. This helps them develop their creativity and problem-solving skills.

Soft play ball pools provide physical activity by supporting children's motor and sensory development, encourage social interaction, provide a safe playground, reduce stress and anxiety, increase imagination energy and are suitable for use in entertainment centers, schools, homes, special events, health centers and many other places. can be used elsewhere.

Soft playgrounds support children's physical activity Promotes a healthy lifestyle. Additionally, children's social skills It helps them develop and provides a fun learning environment.

Trampolines

Trampolines

Benefits for Children:

Physical Development: Jumping on the trampoline strengthens muscles and improves motor skills. It has positive effects on balance, coordination and flexibility.

Mental Development: Jumping activity increases children's energy levels and their ability to focus and concentrate.

Fun and Safe: Trampoline offers both a fun and safe activity for children. Children can safely release their energy and have a happy time.

Why Should You Choose It?

Quality and Safety: All components have been carefully selected and designed with the safety of your children in mind.

Fun and Educational: Children learn while having fun. Time spent on the trampoline supports a healthy and active lifestyle.

It is made of 40x40 iron profile and covered with PE foam and sponge.

It is 1100D and A quality, specially manufactured for the PVC balorama used in our trampolines, and is SGS, ISO and TSE certified. Trampolines are specially painted, made suitable for outdoor use and long-lasting. A trampoline jumping net imported from Europe was used. Springs specially produced for trampoline parks are used. Thick gray sponge is used for trampoline protection sponges. Our stairs are manufactured with double railings. A specially manufactured tarpaulin covered with sponge has been applied to the poles. Safety nets with a maximum range of 40 x 40 mm are used in protection nets.

Six Olympic Trampoline

This trampoline is suitable for children and adults. It can provide you with a way to keep healthy and get a lot of fun. It helps to exercise, improve your coordination, balance and agility, trim and shape your legs, and burn calories.

Steel Pipe

Galvanized metal profile is used. It is covered with sponge and tarpaulin.

Upholstery Sponge

22 DNS sponges of 2 cm are used on the platforms.
22 DNS sponge of 7 cm is used in the trampoline mat.

PVC Cover

A tear-resistant 1100 denier 650 gram PVC tarpaulin was used.

Protection Nets

3x3 For the safety of children, the panels are knitted with nets.

MDF

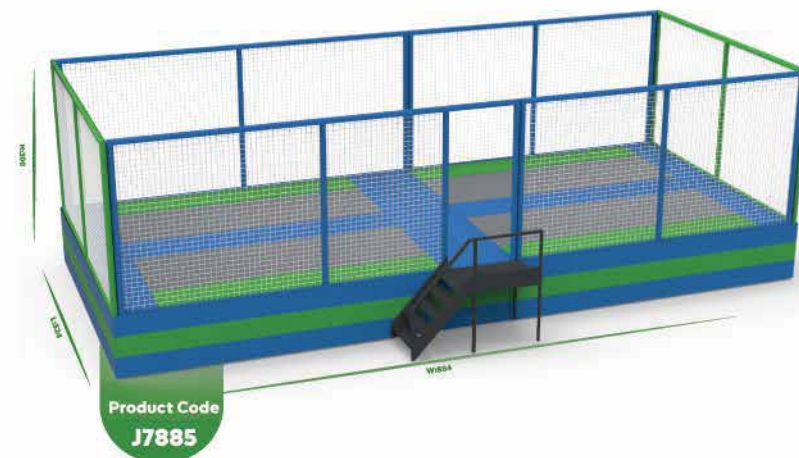

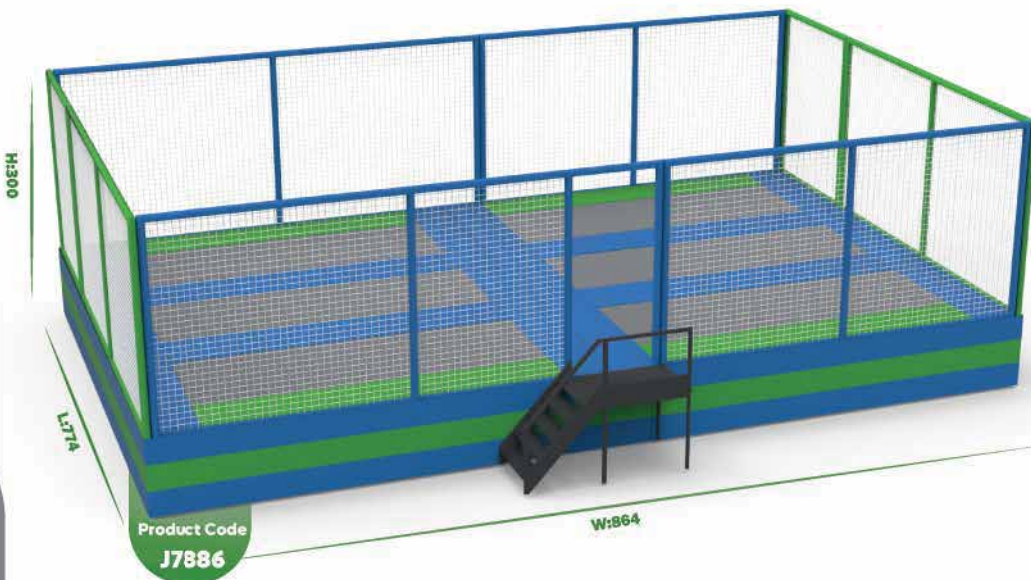

18 mm MDF material was used on the platforms.

Steel Spring

18 cm galvanized steel springs were used.

Wooden Small Flower Playground

Material Details

It is coated with water-based varnish that complies with EN71-3 standards and is suitable for children's health.

Water - Based Varnish

It is made of 5x10 natural pine wood and guarantees durability and quality.

Natural Wood

It is fully impregnated to increase the durability and longevity of the wood.

Impregnation Of The Wood

Plastic screw protectors are used to cover the screws securely, thus increasing safety and aesthetics.

Screw Protector

Rounded edges and corners ensure child safety by minimizing the risk of collision.

Corners Edges

Made from natural pine wood.

It is completely impregnated to increase the durability of the wood and to ensure its longevity. Water-based EN 71-3 Test Report varnish suitable for child health is applied on it. In accordance with child safety, the corners and side edges are rounded against the risk of collision. It is suitable for outdoor use. Indoor playgrounds, children can play safely in closed social areas or in your homes, are produced from harmless materials by being thought health of children. Pine and contra material are used in indoor playgrounds.

Soft Play Ball Pool

Product Code J7839

Square Ball Pool

Product Code J7811

Soft play areas, often known as "soft play areas," are designed for safe and engaging activities for children. They are highly portable, allowing for easy setup and reconfiguration in various spaces, which is vital for adapting to different play environments or storage needs. The use of PVC in corners and edges is crucial as it ensures durability and easy cleaning, while also providing a safe, cushioned environment that minimizes the risk of injuries during play. This combination of features makes soft play areas a popular choice in settings like nurseries, indoor play centers, and home playrooms.

Soft Play elements ideal for gymnastics, active play as well as rehabilitation. We use high resilience foam in mattresses, seats, gym or play corners hide-outs, or therapy aids. Thanks to its plasticity, high resilience, and lightness, the products are easy to carry, safe and exceptionally functional while the phthalate-free PVC fabric resistant to abrasion makes the maintenance worry-free.

Material Details

Made of Faux Leather Material.

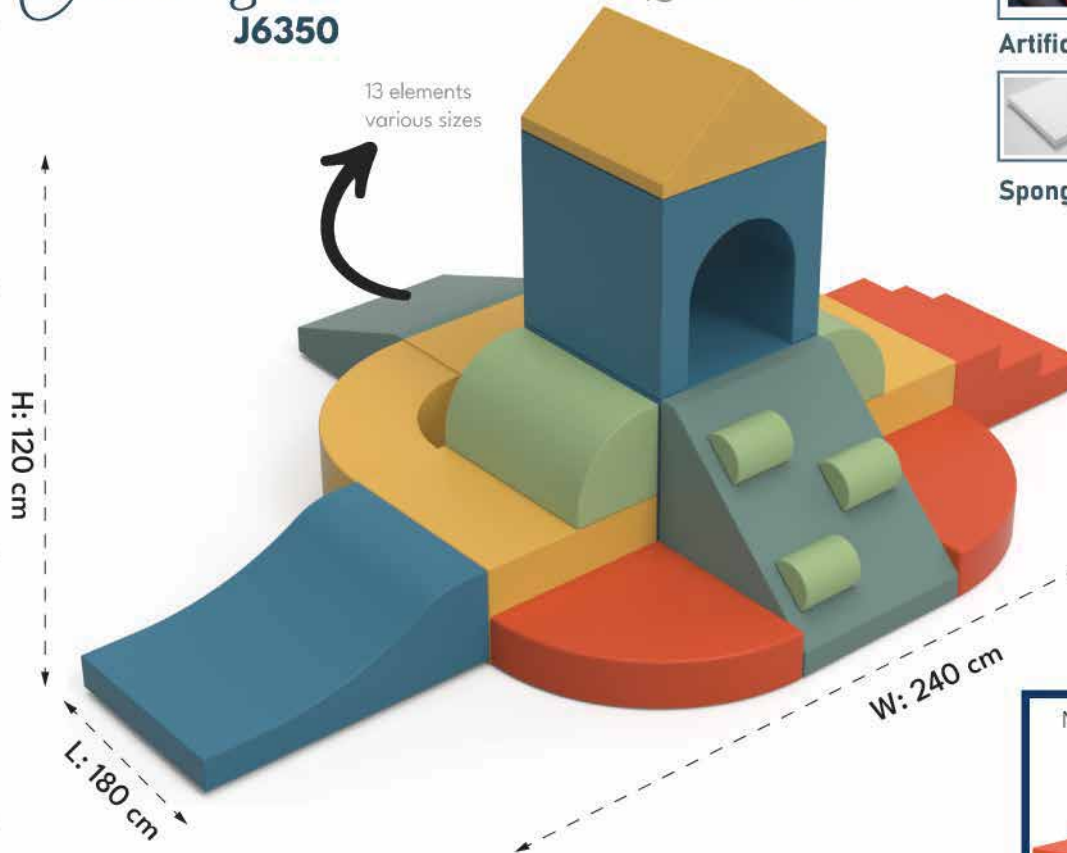

Artificial Leather

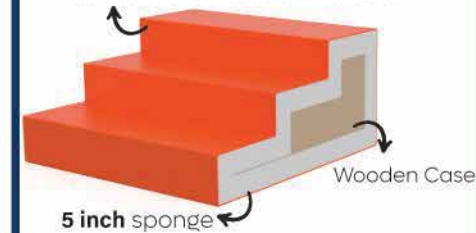

5 inch sponge was used on the MDF case.

Sponge & Wooden Case

color options

Made of Faux **Leather** Material.

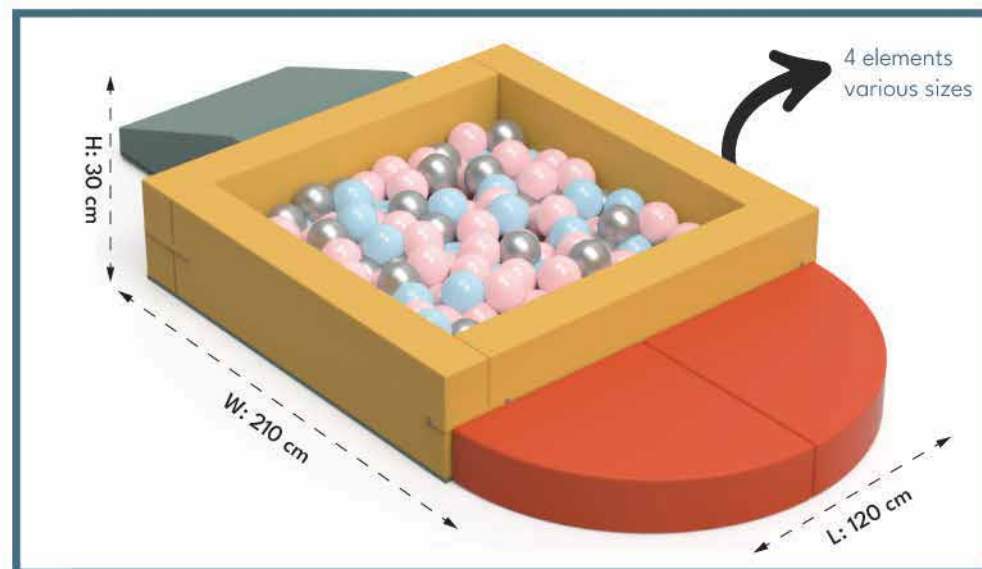

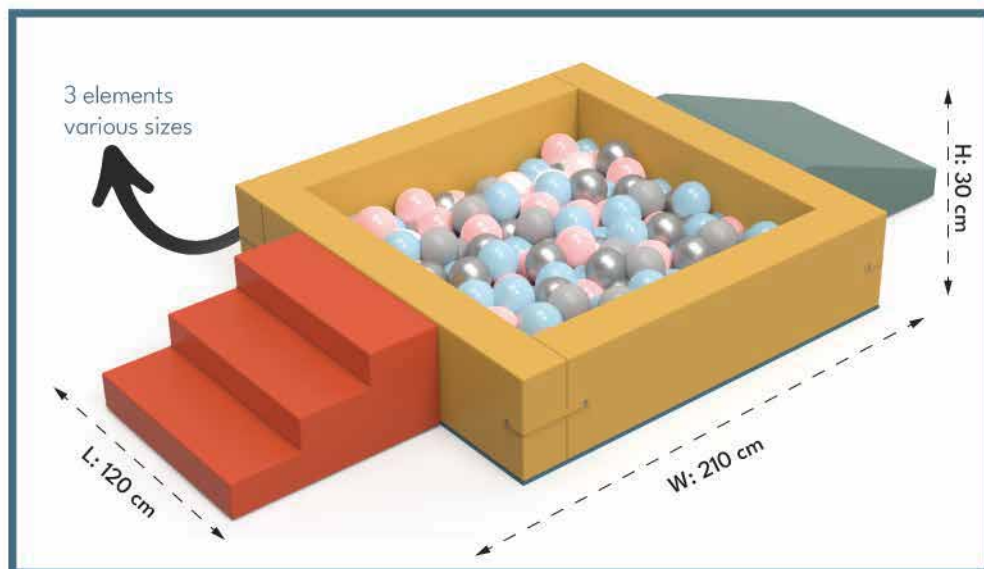

Artificial leather is a synthetic material designed to mimic the look and feel of real leather, often made from a blend of plastics like polyurethane or PVC, offering durability, versatility, and an animal-friendly alternative to traditional leather.

Our sponge leather groups, featuring zippered designs, are highly practical and user-friendly. The zippered feature ensures easy removal for cleaning, making maintenance a breeze. Additionally, the use of 'klay cleanable' material enhances their durability and portability, making them ideal for on-the-go usage in various settings, from home to office environments.
